Antimicrobial Resources

Antimicrobials

An overview..

Inspire · Create · Educate

If you've been researching how best to protect children and practitioners from bacteria and viruses, you've probably come across the word 'antimicrobial'

What is antimicrobial?

An antimicrobial is a substance that kills microorganisms (a word used often to classify bacteria, virus or fungus).

How do antimicrobials kill bacteria?

Quite dramatically, most antimicrobials kill bacteria immediately by causing the bacteria cells to explode. Others consume bacteria resources (what the bacteria needs to spread) which prevents the bacteria from multiplying.

What's the difference between antibacterial and antimicrobial?

Antibacterial chemicals only aim to prevent the development of bacteria. Antimicrobials prevent the spread of bacteria, fungi and some viruses.

Do antimicrobials stop COVID-19?

Antimicrobials haven't been proven to prevent the spread of COVID-19. Because this is a new virus, tests for effectiveness of antimicrobial agents still need to be carried out and completed. But antimicrobials have been tested against viruses that are similar to COVID-19, like SARS and MRSA and have been shown to be effective.

Antimicrobials

Our Resources...

Trying to keep schools and nurseries generally clean and free from bacteria and viruses is a challenge. But technologies such as BioCote® and SteriTouch® contain an active ingredient which makes resources effective against microbial growth.

Antimicrobial soft furnishings

It's still really important to keep environments inviting and comfortable for little ones, but soft furnishings can be difficult to clean. We've created a range of soft furnishings that are not only wipe-clean but also use SteriTouch® technology, which has been proven to kill 99.8% of the bacteria that causes C.difficile and MRSA and other bacteria.

The range contains everything from bean bags and cushions to floor mats and storage bags. It also comes in a range of exclusive patterns; all designed to create calming, cosy nursery environments.

We have some stocked lines, and others are on 4 weeks Direct delivery from the supplier.

Antimicrobials

Our Resources...

Antimicrobial Storage

Gratnells trays are made from tough and safe to use polypropylene (PP). They are approved for use in Nurseries and conform to many international safety standards. These latest Gratnells trays, in translucent and kiwi, have a built-in infection control to keep surfaces free from germs and mould, and reduce cross contamination. Wash or wipe clean, and the protection remains, as it is moulded within the structure of the tray. They are antibacterial, antifungal and antiviral and are up to 99.99% effective against the spread of surface bacteria.

The range includes:

- Trays in our 4 bestselling sizes, in translucent or kiwi colour options
- Matching Lids
- Storage Trolleys

The trays are stocked lines, the trolleys are on 2 weeks Direct delivery from the supplier.

Protective Screens

Protective Screens

We have introduced a range of protective screens, designed to help children and staff feel comfortable in the setting, especially as more children return and more parents and visitors approach the building. The range includes:

- Reception Screens
- Meeting Screens
- Desk Top Screens

Free standing, acrylic screens

Our desktop protection screens are made from 5mm clear acrylic and reduce the risk of airborne germs between colleagues whilst still enabling them visibility. These screens are easy to install, maintain and disinfect and provide a professional solution that is easy to place and move.

Features:

- Available with or without letterbox-style cut-outs to safely pass document
- Sturdy metal feet
- Allows staff to maintain visual contact
- Dimensions: 700mm high, with 6 widths to choose from, ensuring the best fit for your setting.

Direct delivery from the supplier, up to 8 weeks currently.

Acrylic high screen with cut out
From £214.95

Acrylic high screen
From £190.95

Protective Screens

Fitted acrylic screens

Our fitted acrylic protection screens have all the same properties and benefits as our free standing versions. But, come with the added bonus of fixing to your existing furniture, creating a more semi-permanent safety structure. We offer 2 varieties:

Acrylic Screen Toppers

From £166.95

Designed as an add-on to existing fabric or aluminium desktop screens to easily convert your existing screen into barrier screens by adding 300mm of extra infection protection. Supplied with 2 sturdy, universal brackets to fit all existing screens. Dimensions: 300mm high, with 6 widths to choose from.

Acrylic Desk Mounted Screen

From £202.95

The 5mm clear acrylic is supported by two G-clamp desktop brackets that fix to any 25mm desktop. Dimensions: 700mm high, with 6 widths to choose from, ensuring the best fit for your setting.

Direct delivery from the supplier, up to 8 weeks currently.

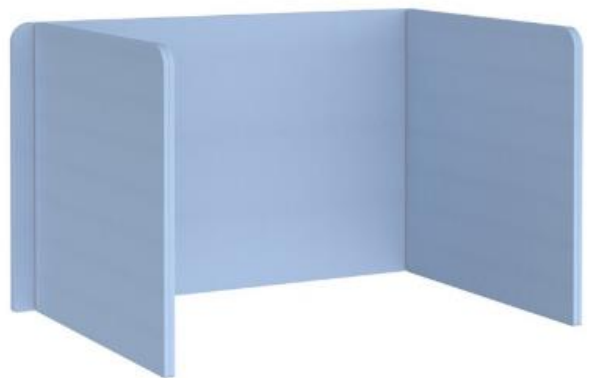

Protective Screens

Fabric screens

Our high 3-sided screens can be added to existing furniture to provide a protective barrier, whether on single desk or bench desk clusters.

Features:

- Easy to install, sits on the desktop with no brackets required
- Highly adaptable for use with single desks, desk clusters, worktables and meeting tables
- Provides a cough and sneeze barrier to reduce the risk of infection
- Upholstered, free-standing high screens designed to add to existing furniture
- Dimensions: 700mm high, with 6 widths to choose from, ensuring the best fit for your setting.

Fabric 3-sided high screens

From £286.95

Direct delivery from the supplier, up to 8 weeks currently.

Mobile Handwashing

Mobile Handwashing

We have just launched a range of IMClean foot operated, Mobile Hand Wash Stations. They are invaluable for nurseries looking to increase hygiene and safety standards, or for those with limited handwashing facilities.

We offer 3 solutions:

1. Standard Ambient Mobile Handwash unit
2. Junior Ambient Mobile Handwash unit
3. Heated Mobile Handwash Station

Standard/ Junior Units

There is no restriction as to where you can locate these mobile stations which requires no mains water, power supply or mains drainage. Just fill with water and you are ready to go. The foot dispenser allows for approximately 200 dispenses from one 20 litre tank so no need to touch the taps.

Features:

- Large wheels and handle make this quick and easy to move
- 20 litre fresh water tank
- Internal water collection
- Supplied with splashback and space for a soap dispenser and paper towels
- Constructed from sturdy stainless steel - easy to wipe clean
- Standard : H1220 x W520 x D543mm
- Junior: H700 x W520 x D592mm

Standard E8R09361
£719.95

Junior E8R09362
£647.95

Direct delivery from the supplier, up to 2 weeks currently.

Mobile Handwashing

Heated Mobile Handwash Station

This stand alone, heated mobile, handwash station, provides a simple, hygienic and easy solution to ensure hand washing is carried out by children, staff and visitors. Designed with built in trough style sink and splashback, with soap and paper towel holder. Comes with an internal waste collection tank, removing the need for drainage. Both the fresh water and wastewater tanks are accessed from the front of the station and are easily removed, so once the station is in place there is no need to move it, unless you want to.

Features:

- 20 litre fresh water tank
- Internal water collection
- Temperature limited to 42°C for safety or can be used as ambient dispense where no power source is available
- Large wheels and handle make this quick and easy to move
- Built in splashback, with soap and paper towel accessories
- Tap dispenses warm running water via foot dispenser
- Constructed from sturdy stainless steel- easy to wipe clean
- H1220 x W515 x D543mm

Heated Station
E8R09360
